For the third time in ten years, the MBTA is offering its riders a choice between draconian service cuts and draconian fare increases in an effort to close a budget gap caused by legacy debt

We will not let our government balance its books on the backs of working people any longer. Debt relief for the MBTA can close the budget gaps without asking the poorest among us to carry a heavier burden.

Send forward funding back to the MA legislature and demand debt relief for the MBTA! It's good for T riders, T workers, T management, and good for the entire 99%!
